

Path "Sentiero delle Foppe"

Alt: 1720 meters

Altitude difference: 550 meters

4 to 5 hours round trip

Steep passages but without technical difficulties. (requires a good physical condition).

Go to Piani Resinelli and park the car on the parking lot behind the bar restaurant on piazzale Daniele Chiappa.

Go through the Tourist Office which provides the hiking trails map. Otherwise, a large signpost indicates the itineraries departing from Piani. The Sentiero del Foppe is the hike n ° 9 indicated on the map. It leads to Rosalba Refuge.

From the parking, towards the Tourist Office, we have a first intersection leading to 3 roads.

Take the 2nd on the right, via alla Carlanta which bypass the church on the right. Soon after the turn, go past the Casimiro Ferrari refuge.

After a right turn, continue in a straight line on the same road.

Less than two kilometers away, it turns lefthand and its name becomes Via del Ram. It bypasses some houses.

Continue this road up to the signpost indicating the "sentiero delle Foppe". This trail is marked in red and white stripes.

The path crosses a beautiful beech forest. The sharp edges of southern Grigna unveil progressively.

As soon as you get out of the woods, the climb becomes steeper.

Then, the path sneaks between the rocks and the green slopes of the mountain range.

The landscape is wild and beautiful.

On the way to the refuge, on the right, the Torre Cecilia mount is a playground for mountaineers. At this point of the trail, the slopes become steeper and the hiking gets more engaging.

On arrival at the refuge Rosalba, the beauty of the landscape is breathtaking.

Return to the Piani by the same path.

Torre Cecilia
